The company's project portfolio includes exemplary office, residential and commercial low energy buildings in Europe, United States, Middle East and Asia. Dr. Draganescu has an extensive background of project and design management of industrial, office and commercial developments in Romania. Dr. Draganescu can be contacted at Bogdan.Draganescu@wspgroup.ro .

Steven Borncamp is the CEO of the Romania Green Building Council. His company SOPOLEC is a founding member of the RoGBC and has organized last April's "Build Green CEE" conference in Romania and numerous other green building initiatives for the region. He has provided strategic advice and managed complex projects for leading multinational companies across a variety of industries in the Central and Eastern European region and the US. Steve was an early advocate of sustainable development and socially responsible business having joined in 1993 the First Affirmative Financial Network - one of the pioneering investment companies in the field. He studied Economics at the University of California, San Diego and has a Masters degree in International Relations from Tufts University's Fletcher School of Law and Diplomacy. Mr. Borncamp can be contacted at Steven.Borncamp@RoGBC.org .

Daiana Voicu is the Managing Director of Willbrook Management International. She is running the company's real estate developments in Romania, Bulgaria, Turkey, Latvia, Georgia and the Czech Republic. Joining Willbrook team 12 years ago, Daiana has managed the development and launching of residential compounds, office buildings and retail projects. With its current portfolio making up over 3.2 million square meters, Willbrook is firmly established

as one of the leading high-end developers in Eastern Europe with a reputation second to none in innovation, green standards and quality.

Graham Reece holds the position of Senior Vice President and Regional Director of Project Management for ProLogis in Central & Eastern Europe. As regional director Graham is head of a project management team spread throughout the region and responsible for the development of design, procurement and construction management technologies. Graham leads ProLogis' strategy for Sustainable Development in the region and having worked in development with ProLogis and Parkridge in UK for 10 years prior to moving to CEE in January has amassed significant experience in the delivery of sustainable logistics centers. Graham graduated with an honors degree in civil and structural engineering in 1986. Graham Reece can be contacted at grahamreece@prologis.com.

Oana Dicu is the Industrial Affairs Manager of Holcim (Romania). Holding a degree in Chemistry, a Masters degree in "Quality of Environment" and an MBA in International Business, she joined Holcim (Romania) seven years ago, focusing on development of environmental projects such as waste co-processing (as alternative fuels and raw materials) and reduction of greenhouse gases emissions from cement production. Committed expert in the field of the climate change, Kyoto Protocol, Joint Implementation (JI) projects and European emission trading (EU-ETS), she is one of the first persons to engage in JI within the (cement) industry and one of the few senior experts in this field. Actively involved in the process of transposing and implementing at the national level the European Union environmental legislation, supporting the Romanian authorities as a cement industry expert, Oana continues the environmental lobbying work at the European level, too. As representative of the Romanian cement industry within the European cement industry association (Cembureau) for the issues of energy and materials, she is actively supporting the shaping the European legislation related to these fields.

Ing. Silviu Chirmuş is Territorial Representative for Somfy. His work consists in promoting the automatic control solutions for buildings shading and ventilation systems, such as: revolving shutters, marchionesses, drapes and windows in order to reduce energy consumption and the environmental impact. Mr. Chirmuş can be contacted at silviu.chirmus@somfy.com or 0740-056286.

Corina Truica is the Managing Partner of CEMS Tehnologii, a company providing Building Automations and Energy Efficiency Solutions for greenfield and retrofit projects. Throughout her career she has been involved in real estate projects at all stages: feasibility studies, project design, development, sale/lease, property management. Combining her green convictions with her skills in real estate finance, Corina Truica believes that green buildings can be more beautiful, comfortable, easy to operate and, at the same time, much more efficient from an economic point of view when art of architects and engineering are targeting a common objective: sustainability.

Tudor Trita is the manager of ARCHIBUS Solution Center – Romania. ARCHIBUS is the #1 Solution for Total Infrastructure and Facilities Management in the World, providing a comprehensive range of applications that support organizations in their endeavor to plan, build and maintain a green building environment. His experience of more than 15 years in IT domains such as CAD, CAFM, GIS and TIFM lead in last years to involvement in international projects for energy efficiency assessment and environmental impact. Mr. Tudor Trita can be contacted at ttudor@asc-ro.com.
